

Write a program to find highest between two number

```
#include<iostream>
using namespace std;
void main()
{
    int x,y,big;
    cout<<"enter the value of x and y\n";
    cin>>x>>y;
    if(x>y)
        big=x;
    else
        big=y;
    cout<<"highest no is:"<<big;
    return(0);
}
```

OUTPUT

enter the value of x and y
