

Write a program to find two number add

```
#include <iostream>
using namespace std;
class sum {
private:
    int x, y, z;

public:
    void input();
    int add();
    void output();
};
void sum::input()
{
    cout << "enter the value for x & y" << endl;
    cin >> x >> y;
}
int sum::add()
{
    z = x + y;
    return (z);
}
void sum::output()
{
    cout << "addition of two num is=" << add();
}
int main()
{
    sum obj;
    obj.input();
    obj.add();
    obj.output();
    return (0);
}
```

Output

enter the value for x & y

3 7

addition of two number is=10
